## **GCCS System Administration & COP Management Instructor Handbook**

This handbook is designed to provide the instructor with an outline to assist in the successful facilitation of the course ware to students with the purpose of providing basic topic introductions and administration practices that will allow any user at any level of knowledge the ability to perform basic System Administration functions and introduce them to the Common Operational Picture Management guidelines.

Items that are highlighted in a **BOLD** are items that the student/user would click on or select by using the appropriate mouse buttons.

Items that are *ITALICIZED* are commands or information that must be entered via keyboard entry.

Items that are underlined are applications, application sub-menus or application title windows for selectable or input required items.

Items that are enclosed in with the greater than and less than (< >) signs are keyboard keys that need to be used to complete the operation (i.e., Press the <ENTER> key).

Key items are identified in the *Monotype Corsiva* font; these items should be stressed to the student/user as they usually pertain to key instructional information.
